India needs three million doctors, 3.6 million hospital beds by 2034

The Indian healthcare delivery system will need to add 3.6 million beds, three million doctors and six million nurses over the next 20 years, says a recent study by consultancy PriceWaterhouseCoopers (PwC). The report, called 'The Future of India - The Winning Leap', says roughly 100,000 hospital beds have been added annually over the last decade and if India continues to maintain this rate, it will fall short of target by 1.6 million beds by 2034.

At present, there are only 0.65 doctors, 1.3 nurses and 1.5 hospital beds per 1,000 people in the country. The desired requirement by 2034 for every 1,000 people is 2.5 doctors, five nurses and 3.5 beds. To achieve this standard, the study estimates, an investment of around \$246 billion would be required.

CAREER OPPORTUNITIES AFTER MBBS ABROAD

PG in India :

As a foreign medical graduate or the students who've studied MBBS outside India, doing Post Graduation in India is the first and foremost priority. After completing MBBS from abroad, the students can choose among various postgraduate medical programs to become a specialist, only after giving the NEET PG exam or the NEXT exam in the coming future.

NEXT 1: After the MBBS final year. MCQ Based Exam. (Get License to Practice in India) (Get PG Seat as per merit)

NEXT 2: After the internship. (Practical Exam)

To get PG seats in India, Candidate must pass both exams.

Medical colleges in India offer 74 Postgraduate Masters in Medicine (M.D.) or Master of Surgery (M.S.) courses which are of 3 years.

It is also a single window entrance examination for PG courses. It is one of the best countries to do PG after MBBS.

USMLE (www.usmle.org)

USMLE for foreign medical graduates is also a popular career option. Every year several student give USMLE to establish themselves as licensed medical practitioner in USA. USMLE has 3 Steps: USMLE 1, USMLE 2 (CK and CS) and USMLE 3

USMLE 1: It's an online MCQ based examination which can be given at the end of 2nd year of MBBS.

USMLE 2: It has 2 steps USMLE 2 CK and USMLE 2 CS

USMLE 2 CK: Computes based test Day Examination, which can be given in the 4Th year of MBBS. It is taken at the various test centers around the world.

USMLE 2 CS: The test requires you to examine and diagnose actors posing as patients. For the Step 2 CS, students must travel to one of five testing centers around the United States.

After these exams, you will be eligible to get the residency in USA. After clearing these you can apply for the ECFMG certification.

USMLE 3: It's an online exam to pass and be a licensed doctor in USA.

This is one of the most popular career options after studying MBBS abroad. But to become eligible for the USMLE, the student must be studying in a recognized university which is WHO recognized and to check that you can visit the World Directory of Medical Schools.

PLAB (www.gmc-uk.org)

PLAB is the Professional and Linguistic Assessment board Exam. This is a licensing exam for the foreign medical graduates, who've completed their MBBS from outside UK. By clearing this exam, the candidates can do Post graduation from UK and practice as a medical practitioner.

PLAB exam has 2 steps, i.e. PLAB step 1 and PLAB step 2.

PG in Germany

Another good place to study and pursue medicine is Germany. PG in Germany is popular option for foreign medical graduates. Students who have done MBBS from abroad or even from India would like to do PG from Germany, because of the multiple benefits. But the only drawback, which several students find is, the language. Students have to clear German language test. Here, is the process to pursue PG in Germany after MBBS abroad.

PG in Australia (www.amc.org.au)

Students can also think of studying PG in Australia after MBBS abroad. The postgraduate program is the Doctor of Medicine.

It provided us pre-medical orientation which gives us basic knowledge and idea about major and 1st-year subjects of MBBS. We visited Gandhinagar Civil Hospital, Apollo Hospital, and Medical Museum.

-VATSAL PANCHAL

“ The management of MDO is first class and all sir and madam are very helpful. Without their transparent process & guidance, I never think my dreams to become True (Become a DOCTOR) The pre-medical program helps me to understand all the subject which I have to learn in the next 5 years.

-MOHAMMAD NODSOLA

“ 2020 has been hard on all of us in different ways. It was my dream to become a doctor but I scored less in need due to some reason and was not in a position to figure out how to make it possible. But due to the support and guidance of MDO, I would be able to fulfill it. I was shocked when I found that an organization would care so much about student's futures as MDO did. They have premedical orientation/classes that create a strong foot for students. The hospital visits and online classes would be immensely helpful and would help us MDO's students to have a better start than the rest.
