MBBS – A DREAM OR A REALITY

Making Doctor's Organization is a global platform for MBBS aspirants to inspire more individuals to pursue medicine and improve the health of nations. MOD is India's leading MBBS Abroad Admission Consultancy awarded by the Hon. CM of Gujarat in 2023.

Umang Patel, Managing Director of MOD, is available for all students to provide free career counselling and psychometric assessments. Briefing MOD's role he says that "More than 7 lakhs students every year drop their dreams because of unavailability of medical seats. When students and parents are confused about getting admission to MBBS, MDO's Team of reputed doctors, education experts and professional career counsellors comes into the scene and plays an important role in making students' dream come true to become a Doctor with an affordable budget of Rs. 1.80 lac per year fees in foreign's top government universities of Russia, Georgia, Philippines, Uzbekistan, Kazakhstan, Belarus, Egypt, Nepal & Central America and more with accurate guidance and services."

MDO's success portfolio since the last fifteen years consists of more than 10000 students counselled and more than 4000 students placed for MBBS in India and abroad. MDO occupies authorized representatives of more than 31 Universities from 11 plus countries. MOD has its presence in India with more than 9 offices and pan globe with 11 branches.

A key feature of MOD's coaching centres lies in providing free pre-medical orientation training for 45 days, and clinical practice during vacation in hospitals of Gujarat. FMGE/ NEXT coaching on campus abroad throughout 6 years, Indian vegetarian food facility at Indian hostels and Indian coordinator with Indian faculty and many more services available.

As a doctor for the last 25 years, treating millions of patients, I always felt that India is in great need of new young doctors like you to provide sound health services to the last man in the remotest villages of India.

Best wishes to all of you to make the medical field your goal and fulfill your and your parents' dreams. In the journey of the medical field, I am always with you wherever I feel the need for study, guidance or motivation.

May we all produce more and more doctors in India to serve the nation.

MBBS in India is one of the highly preferred courses by medical aspirants worldwide. The strong education structure, sincere professors, and top-hole medical universities in India are paving the way for success. To secure admission for MBBS courses in India, the aspirants are required to appear in NEET. A healthy and peaceful environment in India helps the students to acquire knowledge more quickly. MBBS in India demands a student to get at least 50% in the 10+2 examinations. The duration of MBBS courses in India is of 5.5 years. The first 4.5 years is allotted for the classroom training, and the rest is for the internship course. If you are thinking of earning an MBBS degree from a recognized university, India is a great choice. WHO, NMC, and UNESCO approve all the top medical colleges in India.

CAREER OPPORTUNITIES AFTER MBBS ABROAD

PG in India:

As a foreign medical graduate or the students who've studied MBBS outside India, doing Post Graduation in India is the first and foremost priority. After completing MBBS from abroad, the students can choose among various postgraduate medical programs to become a specialist, only after giving the NEET PG exam or the NEXT exam in the coming future.

NEXT 1: After the MBBS final year. MCQ Based Exam. (Get License to Practice in India) (Get PG Seat as per merit)

NEXT 2: After the internship. (Practical Exam)

To get PG seats in India, Candidate must pass both exams.

Medical colleges in India offer 74 Postgraduate Masters in Medicine (M.D.) or Master of Surgery (M.S.) courses which are of 3 years.

It is also a single window entrance examination for PG courses. It is one of the best countries to do PG after MBBS.

USMLE (www.usmle.org)

USMLE for foreign medical graduates is also a popular career option. Every year several student give USMLE to establish themselves as licensed medical practitioner in USA. USMLE has 3 Steps: USMLE 1, USMLE 2 (CK and CS) and USMLE 3

USMLE 1: It's an online MCQ based examination which can be given at the end of 2nd year of MBBS.

USMLE 2: It has 2 steps USMLE 2 CK and USMLE 2 CS

USMLE 2 CK: Computer based test Day Examination, which can be given in the 4th year of MBBS. It is taken at the various test centers around the world.

USMLE 2 CS: The test requires you to examine and diagnose actors posing as patients. For the Step 2 CS, students must travel to one of five testing centers around the United States.

After these exams, you will be eligible to get the residency in USA. After clearing these you can apply for the ECFMG certification. USMLE 3: It's an online exam to pass and be a licensed doctor in USA.

This is one of the most popular career options after studying MBBS abroad. But to become eligible for the USMLE, the student must be studying in a recognized university which is WHO recognized and to check that you can visit the World Directory of Medical Schools.

PLAB (www.gmc-uk.org)

PLAB is the Professional and Linguistic Assessment board Exam. This is a licensing exam for the foreign medical graduates, who've completed their MBBS from outside UK. By clearing this exam, the candidates can do Post graduation from UK and practice as a medical practitioner.

PLAB exam has 2 steps, i.e. PLAB step 1 and PLAB step 2.

PG in Germany

Another good place to study and pursue medicine is Germany. PG in Germany is popular option for foreign medical graduates. Students who have done MBBS from abroad or even from India would like to do PG from Germany, because of the multiple benefits. But the only drawback, which several students find is, the language. Students have to clear German language test. Here, is the process to pursue PG in Germany after MBBS abroad.

PG in Australia (www.amc.org.au)

Students can also think of studying PG in Australia after MBBS abroad. The postgraduate program is the Doctor of Medicine.

If a student wants to practice medicine in Australia, without doing MBBS from Australia, the student will need to do Australian Medical Council (AMC) Exam. The Australian Medical Council Exam is in three parts. 1 AMC CAT MCQ Examination 2. AMC Clinical Examination 3. AMC Workplace based Assessment.

Canada (www.mcceexams.com)

For acceptable medical degree in Canada, Candidate must pass the Medical Council of Canada Evaluating Examination (MCCEE) to demonstrate equivalent general medical knowledge. Students must provide proof of language proficiency. This may involve taking the TOEFL (Test of English as a Foreign Language) and the TSE (Test of Spoken English).

Students can get Employment & Stable Career Globally

- Government, Private Hospitals or Charitable Institutions
- Nursing homes/Clinics/Health departments
- Medical services of the Army, Navy and Air force,
- under the Ministry of Defence
- Medical colleges and training institutes as Professor.
- Research Institutes and medical colleges as researchers

NEXT COACHING

NEXT coaching is a type of exam preparation that helps students prepare for the NEXT exam. It can help students improve their time management, conceptual clarity, and application of concepts to real-world situations.

What does NEXT coaching include?

- **Notes:** Subject specialists provide notes on the subjects
- **Mock Tests:** Test series and mock tests help improve time management, speed, and accuracy
- **Updates:** Coaching classes share the latest exam updates
- **Tips:** Coaching classes provide important tips for preparation
- **Doubt-Solving:** One-on-one guidance to strengthen weak areas
- **Study Material:** Updated study material based on the latest syllabus
- **Case-based Learning:** Focus on case-based learning and real-world applications

Benefits of NEXT coaching

- Helps students understand, think, and apply concepts
- Helps students apply concepts to practical situations
- Helps students channel their efforts
- Helps students prepare in a customized way
- Helps students build concepts and solve doubts

USA - USMLE

Step-1 & Step-2:

Students/Graduates of a US or Canadian medical school program which is accredited by the Liaison committee on Medical education (LCME) or the American Osteopathic Association (AOA).

Medical students or graduates of a medical school outside the United States & Canada and eligible for examination by the ECFMG (Education Commission for Foreign Medical Graduates)

Step-3:

All the students who have qualified the above to steps (Step-1 & Step-2). ECFMG certified graduates or medical students outside the United States & Canada.

USMLE also known as US residency exam consists of three steps:

Step-1: Basic Sciences | Step-2: Clinical CK and CS | Step-3: Patients managements skills

Australia - AMC - MCQ Exam

All the students who want to practice in Australia should first apply to the Australian Medical Council (AMC) to arrange an appropriate assessment pathway. The standard pathway involves the students to sit through a series of assessments, such as AMC MCQ Exam and AMC clinical Exam.

To appear for the AMC- MCQ and AMC Clinical exam, the students must have graduated from any institution recognised by AMC itself.

The AMC MCQ Exam generally consists of 150 MCQs organized through a computer adaptive scoring system.

To qualify the AMC clinical exam, a candidate must pass at least 12 out of 16 cases including one compulsory case in each of Gynae and pediatrics.

The candidates who have qualified all the necessary exams and obtain AMC certification can then proceed to apply to Australian Specialty Training Positions.

Australia is establishing a national registration process for all the doctors under the Medical Board of Australia.

Canada - Medical Council of Canada (MCC) - LMCCQE Exam

Medical Council of Canada (MCC) is an organization that is charged with assessing medical candidates, evaluation of physicians through exams and granting a qualification called Licentiate of the Medical Council of Canada (LMCC) to those who wish to practice medicine in Canada.

The MCCQE Part I is a summative examination that assesses the critical medical knowledge and clinical decision-making ability of a candidate at a level expected of a medical student who is completing their medical degree in Canada. The examination is based on the MCC Objectives, which are organized under the CanMEDS roles. Candidates graduating and completing the MCCQE Part I typically enter supervised practice.

The MCCQE Part I is a one-day, computer-based test. You are allowed up to four hours in the morning session to complete 210 Multiple-Choice Questions. You are allowed up to three and a half hours in the afternoon session for the Clinical Decision-Making component, which consists of 38 cases with short-menu and short-answer write-in questions.

The exam is based on a Blueprint that assesses your performance across two broad categories:

- Dimensions of care, covering the spectrum of medical care;
- Physician activities, reflecting a physician's scope of practice and behaviors.

United Kingdom- GMC PLAB EXAM

The General Medical Council of UK (GMC) is the regulatory body for doctor's licensing in the UK. Currently, there are two types of basic registration: "provisional registration" and "full registration", and two types of specialty registration: "specialist registration" and "GP registration". In November 2009, the GMC introduced the "license to practise", and it is required by law that to practise medicine in the UK, all doctors need to be registered and hold a license to practise.

Passing the PLAB test is one of the ways in which an individual can satisfy the General Medical Council (GMC) that they have the knowledge and skills which are necessary to practice medicine in the UK.

PLAB implies for Professional and Linguistic Assessments Board Test.

The PLAB test is relevant for international medical graduates aspiring to study or practice in the United Kingdom. PLAB test is designed to test one's ability to work safely in a first appointment as a senior house officer in a UK hospital in the National Health Service (NHS).

Eligibility for PLAB

- A primary medical qualification (PMQ) for limited registration.
- Universities must be listed in the World Directory of Medical Schools published by the World Health Organization.
- A minimum of 7 as an overall score and in the speaking section, and 6 in each of the other sections in the IELTS test (academic module).

HOW TO CHOOSE UNIVERSITY & COUNTRY FOR MBBS

Choosing the right destination is the first step
towards becoming a successful doctor.

KEY FACTORS TO CONSIDER

AGE OF UNIVERSITY

Choose universities with a strong legacy, experience and proven track record in medical education.

COLLEGE SELECTION GOVERNMENT OR PRIVATE

Evaluate whether a government or private university suits your academic and financial preferences.

Ranking

Consider national and international rankings for academic reputation and global recognition.

RECOGNITION

Ensure the university is recognized by NMC/WHO and other global medical bodies.

Quality of Education

Look for updated curriculum, experienced faculty and practical-oriented training.

Academic Infrastructure

Check for modern labs, libraries, hospitals and research facilities.

Medium of Instruction

Choose a university where the medium of instruction is English.

Weather Condition

Consider the climate and weather for a comfortable and healthy stay.

Availability of Indian Mess

Indian food availability helps in maintaining health and comfort while studying.

Expenses & Budget

Plan your total expenses including tuition, hostel, food, travel and other living costs.

Accommodation & Safety

Ensure safe, secure and comfortable accommodation facilities for international students.

Indian Student Ratio

A good number of Indian students makes adjustment easier and provides a supportive environment.

Emergency Assistance

Choose a destination that offers reliable support and assistance to students in emergencies.

STUDENTS REVIEW

"Making doctors Organization helps us to gain knowledge about medical field helps us to gain self-confidence, which is very unique support. Here pre-medical orientation was held in Ahmedabad, in which we were taught regarding the major first year subjects that is anatomy, physiology and biochemistry. The books were provided free of charge by the MDO. Due to this pandemic Premedical orientation was also held online also after 1Month training at Ahmedabad Centre, in which we have studied about the Structure, function and location of different body organs.

-DIVYARAJ GADHAVE

"MDO is an institution that guides students who want to become a doctor and provides complete information as well as assistance for students who want to study abroad. Making doctors organization is the best institution for medical students. This institute also organized seminars for the students as well as takes them for hospital visits.

-RIYA GHANCHI

"MDO is very great organization for students who have the dream to become a doctor. After admission formalities done they arranged Pre Orientation program. They help students to get with their colleagues with whom they will be spending the next 5 years. The efforts given by the organization is commendable. They are helping the students to develop their personality. Mdo is the institute where the student gets an exposure towards world by giving the practical knowledge by various field visits.

-MANAV MODI

"The main aim of the pre orientation program organized by the MDO is to help student to bond with each other's so that they could be helpful to each other when in need. The organization help the students for fulfilling their dreams learn the important things such as manners, which is important for us. They teach us how to value our surrounding and respect everybody equally.

-PAVAN TOMAR

"MDO is one of the trusted organizations I have come across. It was totally a new experience being here in MDO. Here they gives classes of pre-medical orientation in which we learnt basic anatomy, physiology, medical terminology, forensic medicine, etc. There was entire session on personality development. We were also given an opportunity to analyze live post mortem at GMERS, Gandhinagar.

-BANSI BHESANIA

"MDO is very good platform to gaining knowledge and confidence and building basic medical terminology that we require in future we visit many hospitals and it benefitted us by knowing that how a doctor should be. MDO provide us well known doctors so that they can guide us for students who are staying outside Ahmedabad they provide the facility of staying in PG helped a student to become independent and gives us glimpse of the life they behave to live outside India.

-ASTHA SONDARVA

"I'm very happy that I will fulfill my dream to be good doctor in my life and that is possible through only Making Doctor Organization (MDO). Team of MDO is really very helpful and yet not they also provide a quality content and they also keep get together with a experienced Doctor's like "Dr. Anil Chauhan Sir" MDO has kept many visits of Civil hospital and also Apollo hospital and several other places.

-FARHAN MOMIN

"The management of MDO is first class and all sir and madam are very helpful. Without their transparent process & guidance, I never think my dreams to become True (Become a DOCTOR) The pre-medical program helps me to understand all the subject which I have to learn in the next 5 years.

-MOHAMMAD NODSOLA

"To be a doctor is my dream since childhood. I didn't get admission in India because of my low marks in the next exam. So I visited making doctors organization. Umang sir and Rajendra sir also Rajan sir gave accurate advice and motivation so I decided to do MBBS in Russia. They provides us pre-orientation that gives us basic information about what we have to study further in MBBS. We visited many hospitals like Gandhinagar civil and Apollo hospital, Ahmedabad. Presentation classes help me to boost my confidence level.

-RAJ PATEL

"Making doctor organization is a wonderful platform. My name is PRAJAPATIDARSHAN MATHURBHAI. To become a doctor is my childhood dream. To fulfill my dream I attempted NEET exam but I got less marks in exam, So I left hope of becoming a MBBS student. Then I visited MAKING DOCTOR ORGANIZATION, Umang sir and Rajendra sir gave me advice for doing MBBS in abroad. So I decided to take admission in Russia. MDO started pre-orientation

-DARSHAN PRAJAPATI

"I remember when we were confused about the career, bad experience with other agents & wrongly wasted my 2 months. I almost lose my hope for my dream MBBS Study. After that we met Umang Sir, we were thoroughly guided By Umang sir and the Team. He leads us from darkness to a bright future. The support, the help as well as true guidance provided by Umang sir is incredible. And hence we appreciate the boost given by sir and the team and thanking them to lead us here. Thanks a Lot from my whole family.

-HET JAISWAL

"The best part of this organization is that, they guided from first to end and with transparency, honesty with professional attitude. Anyone wants to get true guidance than without doubt its one and only organization for MBBS Aspirants. It provided us pre-medical orientation which gives us basic knowledge and idea about major and 1st-year subjects of MBBS. We visited Gandhinagar Civil Hospital, Apollo Hospital, and Medical Museum.

-VATSAL PANCHAL

"2020 has been hard on all of us in different ways. It was my dream to become a doctor but I scored less in need due to some reason and was not in a position to figure out how to make it possible. But due to the support and guidance of MDO, I would be able to fulfill it. I was shocked when I found that an organization would care so much about student's futures as MDO did. They have premedical orientation/classes that create a strong foot for students. The hospital visits and online classes would be immensely helpful and would help us MDO's students to have a better start than the rest.
